

"Veterans Protecting America"

In 2006, Valmy was incorporated with the momentum of the French Government's drive to have a French manufacturer of respiratory protection masks.

Over the last 15 years Valmy has evolved to become the European specialist in respiratory anti-virus protection. Since 2006, we've developed several generations of easy breathing masks and increased our capability to manufacture a wide variety of PPE products.

Today Valmy is the manufacture of choice for the French Government and is along standing supplier to the British N.H.S. Our products protect millions of people everyday. During the COVID-19 crisis we have increased our capacity by 1000% expanding rapidly to satisfy European demand.

Valmy is now seeking FDA approval, with the sole aim of saving and protecting the lives of the American people.

# Manufacturing Standards

Valmy manufactures to international standards and is ISO 9001 - 13485 certified.

The E.U. certification laboratory has awarded Valmy the CE label, which certifies our products meet European standards.

# Protecting Frontliners

Propelled by COVID-19 Valmy innovatively expanded to satisfy the overwhelming customer demand. Valmy increased capacity 10x by re-purposing facilities, commissioning new machinery, trebling the amount of staff, and optimizing shift schedules.

The NHS logo, consisting of the letters 'NHS' in a bold, white, sans-serif font, set against a blue rectangular background.

**We created the British N.H.S a brand new dedicated facility, with 100% of the production staff and logistics servicing their PPE needs.**

The French Healthcare logo, featuring a stylized heart shape formed by a blue and red outline, followed by the text 'French Healthcare' in a blue, sans-serif font.

**We are the mask manufacturer of choice across the French healthcare system. We deliver tens of millions of masks to French frontliners weekly.**

The French Government logo, featuring a small French flag (blue, white, and red vertical stripes) above the word 'GOUVERNEMENT' in a bold, black, sans-serif font.

**From the Defence to the Health Ministry we ensure all French government workers are protected but also sufficiently stockpiled.**

The Valmy logo, featuring the word 'Valmy' in a white, sans-serif font, set against a blue oval background.The MedSupply America logo, featuring three flags (United Kingdom, United States, and France) above the text 'MedSupply America™' in a black, sans-serif font.

# Valmy in the U.S.A.

## Our Focus

Valmy is currently inundated with requests for production as the world fights to procure our products. Valmy have chosen to place our focus firmly on the US and seek FDA approval.

## Licensed to Supply

Valmy is applying to be FDA approved to begin supplying the USA with our life saving products. Manufactured, tested certified and used to protect millions of people everyday we are confident our products will pass the scrutiny of the FDA.

## Our Vision

We recognise the huge impact our products can have in America's fight against COVID-19, but realise that just supplying may not be enough. Valmy are also taking the unprecedented step of applying for FDA approval to manufacture in the United States of America.

# Surgical Masks

## FFP3 CYRANO

Valmy's patented FFP3 type 11r provides the highest level of filtration, protection and comfort for front-liners. Valmy's FFP3 mask provides the same filtration level as Global brands. Offering 99.9% BFE Valmy's FFP3 awards the user of the equivalent N100 protection. As the principle supplier to several European health services Valmy delivers over 10,000,000 FFP3 masks a week, direct to frontline health workers.

# Surgical Masks

## 3 Ply Mask SURGEOR®

The SURGEOR® has been tested and certified by NELSON laboratories (USA). Surgical masks Type II are designed for medical or nursing use in hospitals, at home or in consulting rooms. It protects the user from infectious agents exhaled through their nose and mouth.

Its anatomic form perfectly fits the shape of the nose and face. The shape welding enables to filter more than 99 % of the exhaled air, which makes Valmy masks a key protection against hospital-acquired infections.

# Full Range of PPE

Our wide range of PPE incorporates different types of infection preventative items to be used across a wide variety of industries during the Covid-19 pandemic and as society reopens.

In addition to our range of masks, we are also able to offer a comprehensive assortment of items designed to mitigate the spread of viral or bacterial infection.

From medical-grade gowns to booties and eye goggles we are able to fulfil the majority of PPE requests.

# Purpose built for you

Currently at full capacity, Valmy creates purpose built facilities to satisfy any new orders.

For both Valmy and our existing clients this is a highly effective way to ensure supply and guarantee distribution.

This service goes beyond just supplying masks, Valmy provide an unrivalled solution for authorities and institutions to efficiently manage their supply chain needs.

Each facility only services one client, Valmy will commit new machinery, and experienced staff with 100% of the manufacturing, and logistics dedicated to servicing your supply chain.

# Your Facility

**New machinery is purchased and installed with 100% of the production for your supply chain**

**Capable of manufacturing tens of millions of at least 3 different types of surgical masks (crucially those needed by frontliners)**

**Staffed by experienced employees who have been responsible for manufacturing hundreds of millions of masks for state level authorities**

**You logistics are independently managed from the supply of the raw materials to delivery of the product**
